CORPORATE OVERVIEW

Overlook Systems Technologies, Inc. is a small business specializing in professional technical and engineering services specifically related to Positioning, Navigation and Timing (PNT) technologies and capabilities. Overlook provides a wide spectrum of timely, responsive, and cost-effective engineering, professional, technical, and programmatic services to our business clients.

In particular, Overlook has extensive knowledge and experience in all aspects of Global Navigation Satellite Systems (GNSS), augmentations (both Land and Space based) policy, acquisition analysis, technologies, system operations, applications and integration, standards development, spectrum, international cooperation and vulnerabilities.

Overlook has supported many United States Government Departments and Agencies in the military, civil, and intelligence sectors and has become recognized as a leading technical services and engineering provider with in-depth, specialized expertise in GPS and the space arena and in interagency collaboration. Overlook has worked extensively with agencies in the DOD and civil sectors in projecting and evaluating the effects of both unintentional and intentional interference with GPS services, or Navigation Warfare (Navwar).

Our core competencies span the spectrum from government policy and planning for space and radio navigation systems, technical support for GPS and future PNT enterprise architectures, structuring and conducting system tests and demonstrations, developing and conducting technical and programmatic training, extensive knowledge of the GPS Control Segment, GPS Operations Center and Modernized User Equipment, implementation of Effects-Based Operations, Navigation Warfare implementation and test, support to intra- and intergovernmental deliberations, and support to international negotiations.

Overlook has expertise in GNSS signal ground monitoring and control development, sustainment and operations. We have contributed to the application of GNSS to earth observation and natural hazard monitoring. Overlook has years of experience in GNSS training programs development. Overlook has supported the RTCA, Inc. in the development of the Wide Area Augmentation System (WAAS) Specification and the GPS/WAAS Minimum Operational Performance Standards (MOPS).

Overlook supports the DoD Policy Board on Federal Aviation, to include coordination with the FAA on Unmanned Aircraft System (UAS) operations and GPS interference testing within the National Airspace System.

PROFESSIONAL SERVICES SCHEDULE

541330ENG Professional Services Technical and Engineering Services (Non-IT)

Services include: applying physical laws and principles of engineering in the design, development, and utilization of machines, materials, instruments, processes, and systems. Services may involve any of the following activities: provision of advice, concept development, requirements analysis, preparation of feasibility studies, preparation of preliminary and final plans and designs, provision of technical services during the construction or installation phase, inspection and evaluation of engineering projects, and related services.

NOTE: Services under this MAS SIN do not include architect-engineer services as defined in the Brooks Act and FAR Part 2, or construction services as defined in FAR Parts 2 and 36.

541715 Professional Services Technical and Engineering Services (Non-IT)

Service include conducting research and experimental development (except nanotechnology and biotechnology research and experimental development) in the physical, engineering and life sciences such as; such as agriculture, electronics, environmental, biology, botany, computers, chemistry, food, fisheries, forests, geology, health, mathematics, medicine, oceanography, pharmacy, physics, veterinary and other allied subjects.

Typical tasks include, but are not limited to, analysis of mission, program goals and objectives, program evaluations, analysis of program effectiveness, requirements analysis, organizational performance assessment, special studies and analysis, training, and consulting; requirements analysis, cost/cost performance trade-off analysis, feasibility analysis, developing and completing fire safety evaluation worksheets as they relate to professional engineering services; operation and maintenance, evaluation of inspection, testing, and maintenance program for fire protection and life safety systems, program/project management, technology transfer/insertion, training and consulting.

NOTE: Services under this NAICs do not include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

541420 Professional Services Technical and Engineering Services (Non-IT)

Services include creating and developing designs and specifications that optimize the use, value, and appearance of their products. These services can include determination of the materials, construction, mechanisms, shape, color, and surface finishes of the product, taking into consideration human characteristics and needs, safety, market appeal, and efficiency in production, distribution, use, and maintenance.

Associated tasks include, but are not limited to computer-aided design, e.g. CADD, risk reduction strategies and recommendations to mitigate identified risk conditions, fire modeling, performance-based design reviews, high level detailed specification and scope preparation, configuration, management and document control, fabrication, assembly and simulation, modeling, training, consulting, analysis of single or multi spacecraft missions and mission design analysis.

NOTE: Services under this NAICs do not include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

An implementation guide for Space launch Integration Services (SLIS) can be found at www.gsa.gov/psschedule - click on "Professional Engineering Solutions".

541380 Scientific Management Solutions Testing and Analysis

Includes testing laboratory services and veterinary, natural, and life sciences; testing services and laboratories; and other professional, scientific, and technical consulting services.

Testing and services include, but are not limited to: physical, chemical, analytical, or other testing services; quality assurance; fire safety inspections; training; safety audits; relying upon experimental, empirical, quantifiable data, relying on the scientific method, and professional services, tasks, and labor categories in the fields of biology, chemistry, physics, earth sciences, atmospheric science, oceanography, materials sciences, mathematics, geology, astronomy, veterinary medicine, statistics, systems science, etc., (excludes social and behavioral sciences).

Examples of labor categories include, but are not limited to, Scientific Researchers, Biologists, Physicists, Mathematicians, Statisticians, Research Engineers, Meteorologists, Lab Technicians, Veterinarians and Veterinary Services, Chemists, Biochemical Engineers, Research Nurses.

Labor Category Descriptions

PROGRAM MANAGER

Summary:

Directs all phases of programs from inception through completion. Manages all aspects and maintains total responsibility for the successful completion of programs.

Functional Responsibilities:

- Manages cost, schedule, and technical performance of programs
- Establishes milestones and monitors adherence to master plans and schedules
- Ensures that all required resources, including manpower, are available for program implementation
- Reviews and maintains responsibility of program financials
- Prepares materials for presentations relative to program reviews
- Makes technical judgments and provides advice on the resolution of technical, schedule, performance, or budgetary problems
- Directs and manages internal/external communications and all functional program activities to meet performance objectives within cost and schedule
- Supervises contractor employees
- Organizes, directs, coordinates, and controls technical and administrative activities associated with program
- Employs methodologies for mentoring team members in problem resolution

Applicable MAS SINS:

- 541330ENG Professional Services Technical and Engineering Services (Non-IT)**
- 541715 Professional Services Technical and Engineering Services (Non-IT)**
- 541420 Professional Services Technical and Engineering Services (Non-IT)**
- 541380 Scientific Management Solutions Testing and Analysis**

Labor Category	Education and Experience Requirements
Program Manager V	Master's Degree or equivalent* and 20 years of relevant experience
Program Manager IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
Program Manager III	Bachelor's Degree or equivalent* and 10 years of relevant experience
Program Manager II	Bachelor's Degree or equivalent* and 5 years of relevant experience
Program Manager I	Bachelor's Degree or equivalent*
*See note on equivalence after last labor category description	

LOGISTICS MANAGER

Summary:

Establishes and maintains logistic support requirements for the maintenance concept, allocation of support requirements, the design for system supportability, and development of new elements of logistics support.

Functional Responsibilities:

- Analyzes, recommends approaches, and plans for the delivery of logistics elements in compliance with current Industry and Government practices
- Ensures that proper logistics considerations are included in system development processes at each major milestone
- Prepares integrated plans, policies, and procedures for logistic support
- Performs cost analysis associated with systems logistic support
- Plans and manages cost and schedule of assigned tasks and projects
- Develops, directs, coordinates, and controls technical and administrative activities for one or more logistics, acquisition, training, technical, or engineering programs
- Makes judgments and provides advice on the resolution of technical, schedule, performance, and budgetary problems
- Performs and directs logistics engineering studies and analyses to determine the impact of advanced technology and other matters on supportability or the impact of instructions and directives on logistics
- Performs systems logistics integration and requirements analysis

Applicable MAS SINS:

- 541330ENG Professional Services Technical and Engineering Services (Non-IT)**
- 541715 Professional Services Technical and Engineering Services (Non-IT)**
- 541420 Professional Services Technical and Engineering Services (Non-IT)**
- 541380 Scientific Management Solutions Testing and Analysis**

Labor Category	Education and Experience Requirements
Logistics Manager V	Master's Degree or equivalent* and 20 years of relevant experience
Logistics Manager IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
Logistics Manager III	Bachelor's Degree or equivalent* and 10 years of relevant experience
Logistics Manager II	Bachelor's Degree or equivalent* and 5 years of relevant experience
Logistics Manager I	Bachelor's Degree or equivalent*
*See note on equivalence after last labor category description	

SECURITY MANAGER

Summary:

Provides oversight for all aspects of system security and program protection planning. Serves as the focal point for all matters relating to planning, organizing, and managing program security.

Functional Responsibilities:

- Provides program protection planning, technology control, and system security engineering oversight
- Performs security related studies and analyses
- Establishes security guidance and enforces handling procedures for classified information, to include Top Secret and Special Access
- Reviews and provides recommendations on security support plans, Statements of Work, Statements of Objectives, and security evaluation reports
- Analyzes security concerns, recommends solutions to problems, and performs administrative security functions as required

Applicable MAS SINS:

541330ENG Professional Services Technical and Engineering Services (Non-IT)

541715 Professional Services Technical and Engineering Services (Non-IT)

541420 Professional Services Technical and Engineering Services (Non-IT)

541380 Scientific Management Solutions Testing and Analysis

Labor Category	Education and Experience Requirements
Security Manager V	Master's Degree or equivalent* and 20 years of relevant experience
Security Manager IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
Security Manager III	Bachelor's Degree or equivalent* and 10 years of relevant experience
Security Manager II	Bachelor's Degree or equivalent* and 5 years of relevant experience
Security Manager I	Bachelor's Degree or equivalent*

*See note on equivalence after last labor category description

SYSTEM ENGINEER

Summary:

Performs professional engineering work in research, development, design, test, analysis, production, maintenance, and operations. Provides leadership and direction for engineering of systems, system elements, interfacing systems, components, devices, and/or processes.

Functional Responsibilities:

- Plans, schedules, conducts, and coordinates detailed phases of a program's engineering activities
- Performs independent research of complicated engineering problems resulting in solutions which directly apply to customer needs
- Performs direct research in development and execution of prototype and operational systems
- Conducts technical analysis to define, analyze, and allocate requirements
- Performs design reviews and participates in technical working groups to ensure technical requirements are met
- Reviews system specifications and the impact on operational requirements
- Assesses modeling and simulation results supporting the evaluation process
- Researches, summarizes, and evaluates engineering data and prepares test reports

Applicable MAS SINS:

541330ENG Professional Services Technical and Engineering Services (Non-IT)

541715 Professional Services Technical and Engineering Services (Non-IT)

541420 Professional Services Technical and Engineering Services (Non-IT)

541380 Scientific Management Solutions Testing and Analysis

Labor Category	Education and Experience Requirements
System Engineer V	Master's Degree or equivalent* and 20 years of relevant experience
System Engineer IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
System Engineer III	Bachelor's Degree or equivalent* and 10 years of relevant experience
System Engineer II	Bachelor's Degree or equivalent* and 5 years of relevant experience
System Engineer I	Bachelor's Degree or equivalent*
*See note on equivalence after last labor category description	

SOFTWARE ENGINEER

Summary:

Performs analysis and design of programming systems, problem oriented languages, management systems, scientific systems, and other related areas of computational projects.

Functional Responsibilities:

- Recommends general methods or investigation to be followed in research and development
- Programs and develops solutions to technical problems calling upon specific training and experience
- Prepares technical and managerial reports, including feasibility and desirability of extensions or modifications to existing software and procedures
- Makes decisions, initiates actions, and implements solutions regarding difficult software problems
- Performs the tasks necessary to carry software component(s) through the software development life cycle
- Develops specifications based on a known set of software component requirements
- Prepares the software component design necessary to meet system specifications based upon knowledge in the areas of hardware capabilities/limitations and operating system environment
- Participates in the implementation of the components accounting for the availability of multiple languages, resource limitations, and maintainability

Applicable MAS SINS:

- 541330ENG Professional Services Technical and Engineering Services (Non-IT)**
- 541715 Professional Services Technical and Engineering Services (Non-IT)**
- 541420 Professional Services Technical and Engineering Services (Non-IT)**
- 541380 Scientific Management Solutions Testing and Analysis**

Labor Category	Education and Experience Requirements
Software Engineer V	Master's Degree or equivalent* and 20 years of relevant experience
Software Engineer IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
Software Engineer III	Bachelor's Degree or equivalent* and 10 years of relevant experience
Software Engineer II	Bachelor's Degree or equivalent* and 5 years of relevant experience
Software Engineer I	Bachelor's Degree or equivalent *
*See note on equivalence after last labor category description	

SYSTEM ANALYST

Summary:

Provides technical and analytical support to assist system engineering in the design, development, implementation, and modification of systems.

Functional Responsibilities:

- Systematically converts requirements into system solutions that are achievable within performance, schedule, and cost constraints
- Performs technical planning, system integration, verification and validation, cost and risk analyses, and supportability and effectiveness analyses for total systems
- Performs regulatory policy administration, project planning, process development, and staff support activities
- Performs functional and timeline analyses, detailed trade studies, requirements and interface definition, and special studies to translate requirements into system specifications
- Evaluates primary and alternate technical approaches and generates impact assessments for system development and enhancement activities
- Conducts requirements analyses, cost-performance trade-off analyses, feasibility analyses, and technology conceptual designs

Applicable MAS SINS:

- 541330ENG Professional Services Technical and Engineering Services (Non-IT)**
- 541715 Professional Services Technical and Engineering Services (Non-IT)**
- 541420 Professional Services Technical and Engineering Services (Non-IT)**
- 541380 Scientific Management Solutions Testing and Analysis**

Labor Category	Education and Experience Requirements
System Analyst V	Master's Degree or equivalent* and 20 years of relevant experience
System Analyst IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
System Analyst III	Bachelor's Degree or equivalent* and 10 years of relevant experience
System Analyst II	Bachelor's Degree or equivalent* and 5 years of relevant experience
System Analyst I	Bachelor's Degree or equivalent*
*See note on equivalence after last labor category description	

SYSTEM ACQUISITION SPECIALIST

Summary:

Manages, plans, and organizes tasks and projects for the entire acquisition life cycle. Develops and reviews documentation that supports acquisition of systems.

Functional Responsibilities:

- Develops and maintains acquisition strategies and documentation including acquisition plans, source selection plans, and requests for quotes/proposals
- Supports program risk management efforts to include cost/schedule/performance risks to provide decision quality information and mitigation plans to the program manager
- Performs earned value management analysis on contractor provided cost performance reports
- Assists the program in preparation of program impact statements for budgetary cut drills
- Assists in preparation of award fee briefings
- Monitors program milestones and assists in the development of schedules
- Provides contract award and post-award support

Applicable MAS SINS:

- 541330ENG Professional Services Technical and Engineering Services (Non-IT)**
- 541715 Professional Services Technical and Engineering Services (Non-IT)**
- 541420 Professional Services Technical and Engineering Services (Non-IT)**
- 541380 Scientific Management Solutions Testing and Analysis**

Labor Category	Education and Experience Requirements
System Acquisition Specialist V	Master's Degree or equivalent* and 20 years of relevant experience
System Acquisition Specialist IV	Bachelor's Degree or equivalent* and 15 years of relevant experience
System Acquisition Specialist III	Bachelor's Degree or equivalent* and 10 years of relevant experience
System Acquisition Specialist II	Bachelor's Degree or equivalent* and 5 years of relevant experience
System Acquisition Specialist I	Bachelor's Degree or equivalent*
*See note on equivalence after last labor category description	

ADMINISTRATIVE SUPPORT

Summary:

Provides administrative support to technical and management-level personnel. This includes documentation planning and support, project administration, general office support, executive secretarial support, human resource planning, event planning and administration, office relocation planning, mail services, records and data input.

Functional Responsibilities:

- Outlines objectives to be achieved, priorities and deadlines in accordance with accepted administrative office procedures
- Reviews completed work for accuracy of data, procedure compliance, and error-free documentation
- Keeps the program office apprised as to progress, problems, and issues associated with the projects
- Develops spreadsheets, databases, and other materials to organize and store program data
- Provides support in the planning, formulation, editing, development, and publication of finished products, e.g., program documentation, plans, directives, reports, and briefings
- Provides support for internal and external briefings and reports by providing expert knowledge and capability in the use of personal computers and operating systems to produce visual aids using appropriate software applications
- Assists in improving internal management processes by proposing and/or implementing improvements to visual, computer based communications used by the program office to manage its critical processes
- Establishes and maintains office files

Applicable MAS SINS:

541330ENG Professional Services Technical and Engineering Services (Non-IT)

541715 Professional Services Technical and Engineering Services (Non-IT)

541420 Professional Services Technical and Engineering Services (Non-IT)

541380 Scientific Management Solutions Testing and Analysis

Labor Category	Education and Experience Requirements
Administrative Support V	Associate's Degree or equivalent* and 15 years of experience
Administrative Support IV	Associate's Degree or equivalent* and 7 years of experience
Administrative Support III	High School Diploma and 5 years of experience
Administrative Support II	High School Diploma and 2 years of experience

Administrative Support I	High School Diploma
*See note on equivalence after last labor category description	

Equivalency Note

Overlook's policy allows:

1. An individual to substitute three (3) years of experience above that required by the minimum for the next higher degree (see chart below)
2. An individual to substitute three (3) years of experience above that required by the minimum for Associate's Degree and six (6) years for a Bachelor's Degree (see chart below)
3. An individual holding a degree higher than that required by the minimum to substitute the higher degree for an additional three (3) years of experience

Education Requirement	Equivalence
Associate's Degree	Minimum experience required plus 3 years
Bachelor's Degree	Minimum experience required plus 6 years
	Associate's Degree and minimum experience required plus 3 years
Master's Degree	Bachelor's Degree and minimum experience required plus 3 years

PROFESSIONAL SERVICES PRICE LIST

<p>The Service Contract Act (SCA) is applicable to this contract and includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should work be performed in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.</p>
